Closet-enclosure ABS, IP65

Water-proof plastic enclosures with closet-door and key and lots of space for power supplies and other larger equipment.

Water-proof plastic enclosures in different shapes with lots of space for power supplies and other larger equipment. The built-in closet-door makes it easy to excess your components and lock it back up with the supplied key.

It is possible to mount parts in the bottom of the enclosure, for example, a DIN rail for various controllers.

The enclosure is perfect for mounting outdoors and can handle temperatures from -40 to +80 degrees. It is water-proof with IP65 and it is impact-resistant with IK08 classifications.
