DIN Feed-through terminal block - PT 2,5

Clever feed-through terminal block for mounting on DIN rail. Push-in termnals for easy connecting. 0,14 mm² - 4 mm².

Clever feed-through terminal blocks for mounting on DIN rail. The terminal blocks have push-in terminals, that make it easy to connect. The terminals can be used for 0,14 mm² - 4 mm² wires.

8-10mm insulation must be removed on the wires.

Green ground terminal block

The green ground terminal block connects the two terminals and the DIN-rail. This allows you to feed the ground connection through the setup without extra wires. If you need more terminals, it is cheaper to use standard blocks together with plug-in bridges.

Plug-in bridge

The plug-in bridge makes it easy to distribute signals and voltages across multiple terminal blocks. This could be output from transformers, relays, or similar, where you need to connect multiple parts. Typically used for ground signals.

Specifications

Rated voltage	800V
Rated current	24A
Wire, area	0,14 mm² - 4 mm²
Temperature, operating	-60 °C ... 105 °C
Temperature, mounting	-5 °C ... 70 °C

2 terminals
SKU 660800
Dimensions: 35,3 x 48,6 x 5,2mm

2 terminals + Ground
SKU 660802
Dimensions: 35,3 x 48,5 x 5,2mm

Plug-in bridge 3-position
SKU 660821

Filler plugs
SKU 660823

4 terminals
SKU 660801
Dimensions: 35,3 x 72,2 x 5,2mm

Plug-in bridge 2-position
SKU 660820

Terminal marking (10 labels)
SKU 660822
