Light base for universal Emblem with LED edge

Waterproof IP65 light base for universal-emblems, that creates a beautiful LED neon outline behind the emblem. Easy to mount. Multiple light-colors.

Waterproof light base for universal-emblems, that creates a beautiful LED neon outline behind the emblem. The emblem lightbase is available in multiple colors, and is dimmable.

No emblem is included. This is only the light base.

The copy-emblems are recognized by the two bosses on the back. The light base is mounted with bolts in the threaded inserts in the plastic. After this the two bosses on the emblem are glued in to the light base. Be aware how the bosses are placed in regards to the emblem, sometimes the manufacturer rotates these incorrectly, and the emblem has to be mounted "tilted".

The emblem is simple to connect with its 3 meter wire.
