Crimp and shrink-connector

Connector that is crimped with a crimping tool, then it is heated up to shrink the shrink-tubing. This protects and insulates the connector.

Connector that is crimped with a crimping tool, then it is heated up to shrink the shrink-tubing. This protects and insulates the connector.

There is 6 different sizes available:

- White, 0.2 - 0.35mm²
- Red, 0.5 - 1.5mm²
- Blue, 2.0 - 4.0mm²
- White to Red, 0.35 - 0.5mm² to 0.5 - 1.5mm²
- Red to Blue, 0.5 - 1.5mm² to 1.5 - 2.5mm²
- Blue to Yellow, 1.5 - 2.5mm² to 4.0 - 6.0mm²

The last three can be used to connect larger wires to smaller, or for making splitters.
