Wiring harness for 5 x Scania LED Positionlamps in sunvisor -2016

Complete harness to connect 5 position lights in the sunvisor on Scania trucks from before 2016 (4-series). Replaces the original with 2 connectors.

Complete harness to connect 5 position lights in the sunvisor on Scania trucks from before 2016 (4-series). Replaces the original with 2 connectors.

The connectors are placed so that there are one in each corner, and 3 closer together in the middle. If you need a special setup we can also do this.

There is a original Scania connector on the input, and original connectors for all the lamps. The connection is completely plug and play

The total length of the harness is 2100mm.

The harness is produced by Matronics

Accessory

Special side-clamps with cable ties are available seperatly, for fastening the cable on the inside of the sunvisor.
