Matronics light source for Gylle marker light

Compact LED emitter that fits directly in to Gylle marker light holders. Available as Dual and Single color in multiple light colors.

Compact LED emitter that fits directly in to Gylle marker light holders. Replaces the original bulb holders, and the original LED emitters.

Our emitters are available as Dual and Single color in multiple colors, all with 6 bright LEDs. With these you get a lot of new possibilities compared to the original Gylle emitters.

As the emitter is separate, you only need a loose glass. These are available as red, yellow, clear and white/frosted. If you want to use dual color, you of course have to use clear or frosted glass

Mounting

The emitters are made so you easily place two emitters together on their backsides, so that there is light on both sides of a holder. They are easily pushed in to the holders, where there is a slid in the middle. The size and shape of the emitter will hold them in the middle without any extra work. The wires just have to be fed throught the wire-hole as the original - we recommend you do this first.

Connecting

Single color lamps have a red wire for plus, and black wire for minus.

Dual color models have two wires, eg. white and yellow. If you connect the white to plus and yellow to minus, the emitter will light white, and vice versa. This means you will have to use polarity flipping to change the color.

Color changing and controllers

The dual color models can be used to change the position light color from yellow to white with a color changer (polarity flipper), or you can use a dual color US light controller, if you want to use them as white marker light and direction indicators.

Specifications

Voltage	24V-30V DC
Consumption	0,75W
Current	30mA
LEDs	6 x Medium power
Wire	1 meter
Potting	Frosted LED PU

24V, Dual Color Red / Yellow
SKU 246100-AMRD

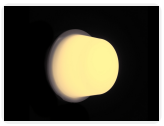

24V, Dual Color Xenon white / Yellow
SKU 246100-AMCW

24V, Dual Color Xenon White / Red
SKU 246100-CWRD

24V, Dual Color Warm white / Yellow
SKU 246100-AMWW

24, Dual Color Warm White / Green
SKU 246100-WWGR

24V, Yellow
SKU 246100-AM

24V, Red
SKU 246100-RD

24V, Xenon white
SKU 246100-CW

24V, Golden yellow
SKU 246100-GY

24V, Warm white
SKU 246100-WW

12V, Dual Color Xenon White / Red
SKU 160010-CWRD

12V, Dual Color Xenon White / Yellow
SKU 160010-AMCW

12V, Dual Color Red / Yellow
SKU 160010-AMRD

12V, Dual Color Warm White / Yellow
SKU 160010-AMWW
