Stiholt mudflap - Small

The original, popular, and smaller Stiholt mudflaps are available in different sizes - both for front and rear mounting on your truck.

The original and popular Stiholt mudflaps can not miss on a truck - and especially not on a Scania. They are available in 5 different sizes, which are for front and rear mounting respectively.

The sizes are 40 x 35cm, 60 x 35cm, and 70 x 30cm. The first 2 mentioned are typically used behind the front- and powered wheels, whereas the last mentioned is typically for the front. There are examples where there have been used multiple smaller mudflaps in a "series" of each other, so it is only your own imagination that sets the boundaries.

The mudflaps are sold as a set of 2 pcs..
