Matronics LED emitter for Torpedo lamp

Compact LED emitters that fits directly into our torpedo lamps. Available in dual-color and single-color in multiple light colors.

Set with 2 pcs LED emitter that fits directly in to our torpedo lamps, which you will be able to find down below under related products. If you have any torpedo lamps already the emitters fit into Roadboy CLC-7321.

All versions are sold as set with 2 emitters.

Our emitters are available as Single color in multiple colors, all with 6 bright LEDs. With these you get a lot of new possibilities compared to the original Gylle emitters. Furthermore, they are available as dual-color where you have the opportunity to switch between colors, for example, white and amber. Last but not least they are also available as dual-color + flash and greeting function, where you, other than dual-color, have flash-/strobe-light and a greeting function when meeting your colleagues on the road.

All emitters are potted, which makes them 100% waterproof.

Mounting

The emitters are made so you easily place them and screw them into the existing holes. The wires just have to be fed through the wire-hole in the torpedo lamp.

Single color

Single-color lamps have a red wire for plus, and black wire for minus.

Dual color

The dual color model changes color when you swap plus and minus. This can be done with a two-pole switch, or by using a polarity-flipper controller.

- Minus - Black wire ledning
- White positionslight - Plus to white wire.
- Yellow positionslight - Plus to yellow wire.

Dual color + flash and greeting

Standard strobecolor is yellow, but it can be customized to eg. blue or white for special purpose vehicles. The greeting function is a small extra detail for greeting colleagues on the road.

There is 7 meter cable on the emitter with M8 connectors, that can be connected to the included controller. The controller manages the two colors, and automatically turn them off when you enable the strobe light. The controller itself has 2 meter wire. The cable has 5 wires:

- Minus - Gray cable
- Plus for white position light - White cable
- Plus for yellow position light - Blue cable
- Plus for strobe light - Brown cable
- Plus for greeting - Black cable

- Minus - Sort ledning
- Hvidt positionslys - Plus til hvid ledning
- Gult positionslys - Plus til gul ledning
