Matronics Retor Color LED Headlight Kit

Very powerful LED headlight kits in retro-colors, available for H1, H3, H4, H7, H8, H9, H11,H16, HB3, and HB4 sockets.

Yellow / orange LED's that actually can be used for other than styling!

Powerful LED headlight kits, available for H1, H3, H4, H7, H8, H9, H11, H16, H27, HB3, and HB4 sockets. The light output is yellow / orange and gives a very nice retro-style light.

The kits are complete with two LED emitters, and connector/cable sets for replacing the original emitters. For cars with bulb-control, it is also possible to purchase Canbus kits for 12V and 24V.

Large light output

The light output is 1100 lumen pr. LED bulb, which is very good for a bulb with yellow / orange light. A standard halogen bulb is typically around 1000~1500 lumen.

This type of LED is characterized by having a narrow cooling unit, where the LED, that goes into the headlamp, is relatively bigger then a regular halogen-bulb

Mounting

The H7 bulb can be adjusted in the socket with the included allen key, this may be necessary for a better light cone. Some cars need an adapter for fitting the headlamp, please look on the Related products below

CANBUS / Pear Control

For some cars, it may be necessary to go with canbus kits to avoid error messages on the car lamp control.
