Excentric clamp lock / cam lever

Cam lever with threaded bolt, that can be used to fasten / lock parts. Easy to release when setup has to be changed.

Cam lever with thread bolt, that can be used to fasten / lock parts. Often used when you need to be able to easily change or adjust a setup without tools. Often seen used on bike seats etc.

The threaded rod can be screwed out of the clamp, and can be replaced with a bolt or similar. You can also shorten the rod.
