LED light source for Hella Talmu DRL lamps

Large and bright emitter that fits in to the original Hella Talmu DRL lamps. 12V and 24V. Creates a nice bright light in the whole lamp. Dual color.

Large and bright emitter that fits in to the original Hella Talmu DRL lamps. It creates a nice bright light in the whole lamp. Available for 12V or 24V, in different combinations of dual color.

The emitters are sold as 1 pc.

The original reflector is taken out, and the emitter placed directly in. 4 rubber washers are included, that hold the emitter in place. There is 10cm wire on the back for connecting it to power. Even though the print is coated for protection against water, you should still make sure that the lamp is sealed.

Dual color

The dual color model has 3 wires, a common ground and a plus for each color. Typically you will connect this to a toggle-switch or relay for color change.

Dual color + flash

Standard strobecolor is yellow, but it can be customized to eg. blue or white for special purpose vehicles. The 12V model has 3 high power strobe LEDs, while the 24V has 6.

There is 7 meter cable on the emitter with M8 connectors, that can be connected to the included controller. The controller manages the two colors, and automatically turn them off when you enable the strobe light. The controller itself has 2 meter wire. The cable has 5 wires:

- Minus - Grey cable
- Plus for white position light - White cable
- Plus for yellow position light - Blue cable
- Plus for strobe light - Brown cable
- Plus for greeting - Black cable

Diffuser

The diffuser gives the light a neon-look, where it is not possible to see the individual LEDs on the PCB. The diffuser only fits our LED emitters.

The diffuser is made of a frosted plate and two springs. The glass is removed from the lamp, and the two springs are places over the two screw bosses, and the diffuser placed on top of those, and the lamp is closed.

Specifications

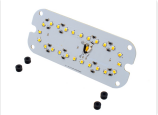

LEDs	24 x 2835
Power	5,8W @ 24V

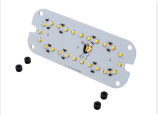

12V, Dual color Yellow / Xenon white
SKU 190776-AMCW

12V, Dual color Yellow / Warm white
SKU 190776-WWAM

12V, Dual color Red / Xenon white
SKU 190776-RDCW

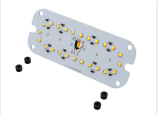

12V, Dual color Red / Yellow
SKU 190776-AMRD

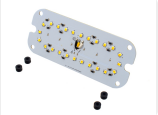

12V, Dual color Yellow / Xenon white + Strobe
SKU 190777-AMCWAM

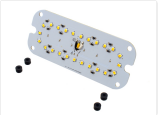

12V, Dual color Yellow / Warm White + Strobe
SKU 190777-AMWWAM

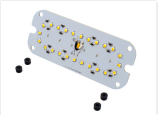

24V, Dual color Yellow / Xenon white
SKU 240776-AMCW
Voltage: 24V-30V
Dimensions: 56 x 130mm

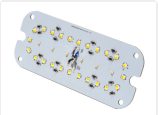

24V, Dual color Yellow / Warm white
SKU 240776-WWAM
Voltage: 24V-30V
Dimensions: 56 x 130mm

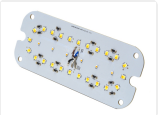

24V, Dual color Red / Xenon white
SKU 240776-RDCW
Voltage: 24V-30V
Dimensions: 56 x 130mm

24V, Dual color Red / Yellow
SKU 240776-AMRD
Voltage: 24V-30V
Dimensions: 56 x 130mm

24V, Dual color Yellow / Xenon white + Strobe
SKU 240777-AMCWAM
