Headlight-mask for Scania Next Gen. 2016+

Headlight-mask for your Scania next generation, that frames the headlights and gives a bad-boy design. Fits next generation-models with halogen- and LED headlights.

Headlight-mask for Scania next-generation models that frames the headlights and gives your Scania a completly different "bad-boy" look, that differentiates you from the rest.

Fits models with both halogen- and LED headlights. There is a small carving in the eyelids for the indicator lights so it does not affect that.

They are made of white plastic, but we recommend painting them for a nicer finish. The set is easily mounted with double-sided tape on the back-side of the lid.

The set contains 2 pcs. eyelids for the headlights on the driver and passenger side respectively.
