Double LED DRL adapter for Scania S + R 2016+

Adapter for the LED headlight on Scania +2016, that turns on yellow position lights in the top indicator at low brightness, and full when indicating.

Adapter for the LED headlight on Scania +2016, that turns on yellow position lights in the top indicator at low brightness, and full when indicating.

The adapter can be used with both original white DRL, and aftermarket yellow DRL, where you then have yellow both top and bottom. Both options are shown in the photos.

The price is for a complete set for a single truck (right + left side)

Mounting

Mounting this is easy, as the adapter is connected between the headlight and the original connector, and the red wire is connected to position light, or a switch for enabling it manually. Original connectors are used for both input and output.
