H4 Osram Night Breaker SMART LED kit, +330% 2 pack, E-approved

E-approved H4 LED headlight kits for legal use on public roads made by Osram.

E-approved LED headlight kits by OSRAM, in their Night Breaker SMART series. Legally usable on public roads.

In this overview, you can see Osram's list of approved vehicles for this specific LED headlight.

The kits are complete with two LED emitters, and connector/cable sets for replacing the original emitters with 6000K. For cars with bulb-control, it is also possible to purchase Canbus kits for 12V.

Large light output

The light output is 1650 / 1000 (high / low) lumen pr. LED bulb - A standard halogen bulb is typically around 1000~1500 lumen.

Mounting

It can be a bit tricky to find space to mount the LEDs on some cars since they need more space in the headlamp than normal halogen bulbs.

CANBUS / Pear Control

For some cars, it may be necessary to go with canbus kits to avoid error messages on the car lamp control.
