# H7 Osram Night Breaker LED kit, +330% 2 pack, E-approved

E-approved H7 LED headlight kits for cars and legal use on public roads made by Osram.

E-approved LED headlight kits by OSRAM, in their Night Breaker Gen 2 series. Legally usable on public roads.

In this overview, you can see Osram's list of approved vehicles for this specific LED headlight.

The kits are complete with two LED emitters, and connector/cable sets for replacing the original emitters with 6000K. For cars with bulb-control, it is also possible to purchase Canbus kits for 12V.

Large light output

The light output is 1500 lumen pr. LED bulb. The light is 6000K and is equal to the colors of a xenon-kit.

Mounting

It can be a bit tricky to find space to mount the LEDs on some cars since they need more space in the headlamp than normal halogen bulbs. Some cars need an adapter for fitting the headlamp, please look on the Related products below.

CANBUS / Pear Control

For some cars, it may be necessary to go with canbus kits to avoid error messages on the car lamp control.
