Complete Classic AMP MCP 2.8 connector

AMP MCP 2.8 connector that is used in earlier vehicles, for connecting lamps and other electronic components.

AMP MCP 2.8 connector that is used in earlier vehicles, for connecting lamps and other electronic components.

Complete set consisting of a connector, 2 terminals and 2 rubber gaskets. Fits wires from 1.0mm2 to 2.5mm2.

You can easily make new, or adjust existing wiring harnesses on your car, truck or trailer.

Crimping tools

Notice that you need the fitting crimp-tooling. The terminals are compatible with tooling for Superseal 2.8 connectors. We recommend this crimping tool, which we also use in our own production.
