Soldertin spool holder

Smart and practical solder holder that keeps your workspace tidy and reduces waste. Capacity up to 1 kg, ideal for both hobbyists and professionals.

Smart and practical solder holder that ensures your workspace remains organized and tidy while effectively reducing solder waste.

Fits Ø0.5 to 2.0mm solder tin, and with a capacity for a solder roll of up to 1 kg, it is ideal for both hobbyists and professionals who want a reliable and easy-to-use solution.

A ball-bearing in the axle makes the spool turn smooth and easily, and the weight of the base ensures stability on the table.

Adapter for ELSOLD spool (30mm)

A simple set of 3D-printed adapter rings, allowing the use of the spool holder with ELSOLD rolls that have a 30mm inner diameter. This can also be found under downloads if you want to 3D print it yourself.
