Inno88 GU10 Downlight for insulation

GU10 Spotlight: 68mm height, use with GU10 LED and max 7W. Easy install. IP44. Approved for insulation.

GU10 Recessed Spotlight with only 68mm installation height and adjustable tilt up to 30 degrees.

Designed for use with GU10 LED bulbs at a maximum of 7W - light sources must be purchased separately.

Easy to install, the downlight is equipped with screw legs and includes spring clips for mounting. This combination makes it especially suitable for gypsum, troldtekt, rockfon, and other types of acoustic ceilings.

Approved for direct installation in insulation. Comes with a pre-mounted junction box with double terminals, allowing for easy loop connections.

Can be used with 70°C wiring, but 90°C is required if the wire touches the lamp cylinder.

Installation depth: 68mm.
Diameter: 88mm.
Cut-out size: 76mm.
IP44 - Resistant to moisture and water splashes on the front.
