Enclosure in ABS, sort - 48 x 95 x 38mm (G1068B)

Compact enclosure in black ABS. Internal screw towers and slots for mounting. Perfect for projects and prototyping.

Compact and robust universal plastic enclosure ideal for electronic projects and prototypes that require a durable and lightweight casing. The enclosure is made of high-quality ABS plastic, providing a solid and protective solution for electronic components.

The black enclosure features a matte finish that protects against scratches and gives a professional appearance. Ideal for projects and solutions where a compact and discreet casing is required.

The enclosure is perfect for both hobby projects and professional applications such as small control units, sensors, and other electronic modules.
