Series 40 - End Bracket with M12

Aluminum bracket for Series 40 profile with M12 thread for foot or wheels. Check dimensions and drawing.

Aluminum bracket that screws into the end of a Series 40 profile. The large block has an M12 thread at the bottom (drawing B), for example, for a foot or for casters / transport wheels. You need an M8 bolt and a track-nut, or a hammer-bolt and a nut to fasten it to a profile.

See dimensions and dimension drawing for measurements.
