Series 40 - Plastic Arm - Freely Movable

Pivot arm with freely moving ball bearings. Rotates 90 degrees. Delivered disassembled with bolts and slot lock for secure fastening.

Pivot arm with ball bearings that moves freely, even under heavy load. Can be used for pivot arms, and various other purposes. The arm can only rotate about 90 degrees, 45 degrees in each direction.

Delivered disassembled, but assembled with the long bolt, two washers, and the nut. It comes with two short bolts to fasten the two parts securely. Also included is a slot lock to ensure the arm does not rotate after fastening.
