Series 20 - Solid angle bracket with side hole

Corner bracket in solid aluminum, with M6 sidehole, which can be used for feet, wheels, or to attach a plate.

Corner bracket in solid aluminum, with M6 sidehole, which can be used for feet, wheels, or to attach a plate. The bracket is typically mounted at the bottom of a frame, where it is fastened with two M6 bolts.

See dimensions and dimension drawings.

As the selection of caster wheels with M6 is limited, you can drill the hole up and make M8 threads instead.
