Series 40 - Solid Angle Bracket with Side Hole

Aluminum corner bracket, for mounting in the corners of two profiles. Side-hole makes it easy to mount wheel or foot.

Corner bracket in solid aluminum, designed for mounting in the corner between two profiles. The side hole makes it easy to mount wheels or a foot. The bracket is installed with two M8 bolts.

View dimensions and dimension drawings.

As the selection of transport wheels with M6 threads is limited, you can enlarge the hole to make M8 or M10 threads.
