LED DRL conversion kit for BMW 3-series (E90, E91, E92 Facelift) 2009-2012

Complete conversion kit for BMW 3-series models 2009-2012, to replace the white LED DRL with yellow light.

Complete set of light sources for BMW 3-Series 2009-2012 (E90, E91, E92 Facelift / LCI) with LED angle eyes, to replace the white LED daytime running lights with yellow lights.

The powerful LEDs provide plenty of light in the yellow color, which is otherwise found only in the new M-models. They are mounted on an aluminum circuit board like the originals, ensuring optimal cooling and lifespan for the LEDs.

There are original connectors on the boards, so the connection is pure plug & play. Each set contains 4 identical circuit boards, two for the right and two for the left.

Please note that the light sources are not e-approved.

Installation

Replacing single-color light sources is relatively simple, taking about ½ hour per headlight the first time.
