Matronics Dual Color Multi-controller, 12V-24V

Dual color controller for all kinds of dual color lamps. Many selectable functions, eg. US-light, rear light, strobe and cabin light.

Dual-color control for all types of dual-color light sources. The controller is easy to install and provides your dual-color lights with far more functionality than a standard color switch or simple on/off control.

With the rotary knob, you can select from the many different built-in functions/modes, such as US-light, tail light, strobe, and cabin light.
