Matronics LED light source for AEB halogen rotating beacon

Compact LED dual color light source fitting the AEB halogen rotating beacon. Replaces the H1 bulb.

Compact 24V LED light source that replaces the original H1 halogen bulb in the AEB 590 / 595 rotating beacons. The light source is dual color, but you do not have to use the color switching, and you can decide it just lights one color.

Available for either 12V or 24V

Each light source contains 42 powerful LEDs. 21 LEDs of each color. The emutter of course works best in a transparent glass.
