AEB 595 Halogen rotorblink, Tube-mounting

AEB's classic halogen beacon by AEB with tube-mounting. Gives your vehicle old school style without compromising safety. 12V and 24V avaiable.

Give your vehicle a true old-school look with AEB's classic halogen rotating beacon – without compromising on safety or visibility. Proudly made in Belgium since 1960, these beacons are engineered to deliver maximum brightness and reliability under all conditions.

The rotating beacon comes equipped with a factory-installed H1 bulb rated at 70W, providing a powerful and highly visible warning light. Choose between 12V and 24V.

If you wish to upgrade, the lens can easily be unscrewed, allowing you to replace the bulb or install one of our LED dual color light sources.

With its solid construction, proven technology, and timeless design, AEB's rotating beacon is the perfect choice for professionals who demand both classic style and dependable performance on the road.

The AEB 590 rotating beacon is for tube-mounting.

Includes rubber base, bolts, and washers for mounting.

Reference: AEB 59024C, AEB 59012C
