Prolumo Commander G3, BT+RF remote 4 channel - 12-24V

Experience the ultimate in control with Prolumo Commander, a programmable control panel designed to control up to 4 devices individually or in groups, depending on your needs.

Experience the ultimate in control with Prolumo Commander, a programmable compact control panel designed to control up to 4 devices individually or in groups, depending on your needs. With 4 dedicated outputs, you can easily customize and control each device separately or synchronize them for joint function.

The control panel comes with a remote panel that has adjustable RGB backlighting, so you can choose exactly the color that suits your style or situation. The remote panel is connected by a 3.2 meter long cable, giving you the flexibility to place it where you want.

In addition, a robust handheld wireless remote control is included.

For even more convenience, you can also control the devices via the included app, SwitchPanel, which supports both Android and Apple devices and allows for wireless control via Bluetooth.
