Degson Connector with Lever Arms

Compact connector box for quick, screwless wiring connections, 450V, 32A, 0.2-4mm², cost-effective alternative to WAGO.

Compact connector box for easy connections. It is suitable for general electrical cable assembly, e.g., in panels, control boxes, or electronic equipment, especially where a secure, robust, and quick installation without screws is desired, along with the ability to visually inspect the connection. Strip length of the conductors is 12mm.

The connector is suitable for wires from 0.2 to 4mm² (24 to 12AWG), with a rating of 450V, 32A.

The connector box functions like the well-known WAGO but is a more economical alternative.

Specifications

Cross section	0,2 to 4mm2 (24 to 12AWG)
Voltage	450V
Current	32A
Temperature	-40 to 85 degree
Strip length	12mm
