Strands Nuuk D-line - 9" LED high-beam

Strands Nuuk D-line LED light merges strong, wide performance with an elegant design, providing 18000 lumens and illumination up to 1647 meters.

Strands Nuuk D-Line 9" is a sleek and powerful 9-inch auxiliary light, engineered with a carefully optimized combo beam pattern. It delivers an impressive light output of 18000 lumens and provides outstanding wide illumination—reaching up to 824 meters at 1 lux with a lateral spread of 80 meters on each side.

The Nuuk D-Line features two power modes as well as dual-color position lights in white and amber. The position lights run along the top and bottom edges and across the center, enhancing its modern and refined appearance.

The two brightness levels allow you to switch between a road-legal (E-approved) output for everyday driving and a more powerful off-road setting (Xperience mode), where no limitations apply.

As the first round model in the D-Line series, the Nuuk D-Line 9" is particularly suited for larger vehicles such as trucks, buses, vans, SUVs, and heavy machinery. However, it can also be mounted on passenger cars, where its slim design makes installation possible even in tight spaces.

The Nuuk D-Line is built from durable aluminum, while the lens is made of nearly unbreakable polycarbonate. The mounting bracket is constructed from stainless steel, ensuring long-lasting performance even in demanding conditions. It is also designed to withstand extreme temperatures, ranging from -40°C to +60°C.

Installation is simple thanks to the 250 cm cable. The light is compatible with both 12V and 24V systems and is protected against radio interference in accordance with ECE R10 standards.

Strands Nuuk D-line - 9" LED high-beam

SKU 24607003

Voltage: 10-32V DC

Consumption: 185W

Lumen theoretical: 18000lm

Lumen effective: 13400lm

Reference: 20

Kelvin: 5700K

Operating temperature: – 40°C to +60°C

Dimensions: 92 x 233 x 220mm
