Smart LED system SP630E

Smart LED controller 12V/24V for single color, RGB, RGBW, RGB+CCT and digital light strip. Can be controlled with remote control or smart app

Smart LED control for 5V–24V, suitable for a wide range of products such as single color light strips, RGB, RGBW, RGB CCT, and digital light strips.

With the included wireless remote or the associated app, you can easily control both colors and light effects directly from your smartphone or tablet. The remote control has a range of up to 50 meters.

Controller

The controller features a compact design measuring only 56 x 56 x 20 mm. It is equipped with both screw terminals and a DC plug for power input, as well as screw terminals on the output and a convenient ON/OFF button. It can handle a maximum load of up to 12A. The controller automatically saves the latest settings, so the light turns on in the same mode as last time when the power is reconnected.

Remote control

The compact remote measures 133 x 48 x 10 mm and uses one CR2025 button cell battery, which is included. The illustration of the remote control shows the functions of the individual buttons.
