Fiber light source for IVECO S-way cabin

LED light for IVECO S-way truck cabins offering red light. Easy installation, no electrical changes needed.

LED light source for the original fiber-optic light sources in the cabin of IVECO S-way trucks. The original comes with blue light, whereas ours features red light. Other colors are possible on request.

The light source are sold individually, and there is typically two fiber-emitters in an IVECO truck. This means you will have to buy 2 pcs to replace both.

Installation

The installation is quite simple but may require a cutting tool for plastic. No electrical changes are necessary as the light source has the same connectors.

- Remove the lamp. The fiber can just be pulled out.
- The back is cut out, as shown in the image.
- The original light source board is removed.
- Ours is inserted, and the back is reattached, tape is probably easiest.
- Reinstall the lamp.
