Strands FOR9T Spanish light, 10-40V

Strands FOR9T double-sided Spanish light featuring striking FOR9T 3D position lights, a dark lens, and dual color functionality.

The Strands FOR9T double-sided Spanish light combines classic styling with modern technology and FOR9T's distinctive design language.

The striking position light strips with a stylish 3D effect, dark lens, and carefully crafted details create an exclusive appearance that adds a unique and modern look to any vehicle. The light is a perfect match for other products in the FOR9T range.

Equipped with dual color marker light, it allows you to easily switch between white and amber front illumination to suit your style and preferences. The rear light remains constantly red.

Built for everyday use in demanding environments, the robust construction features a durable polycarbonate lens and an IP67 rating, providing reliable protection against dust and water for long-lasting performance.

Compatible with 10–40 V systems, the light is suitable for a wide range of vehicles, including passenger cars, vans, trucks, buses, and construction machinery. It comes supplied with a 50 cm cable for easy installation.

All necessary mounting hardware is included, including an M12 nut, M12 flat washer, and M12 spring washer, ensuring a quick, secure, and hassle-free installation.
