Inno88 GU10 Downlight for outdoor

Elegant GU10 spot in stainless steel for outdoor use; IP44 rated, easy 230V installation. Approved for insulation. Enhances outdoor areas.

Modern and Robust Outdoor Lighting

Upgrade outdoor areas with a GU10 recessed spot that combines style and functionality. This spot is perfect for those seeking an elegant and durable lighting solution for their outdoor space.

Functional Design

Made from brushed stainless steel, this spot offers both a modern aesthetic and corrosion protection, making it ideal for outdoor use. With an IP44 rating, it can handle humid air and splashes of water on the front.

Easy Integration and Installation

Designed to be user-friendly, this recessed spot easily connects to a 230V power supply, making installation straightforward. With dimensions of 68 x Ø88 mm and a hole size of 76 mm, it fits perfectly in most standard settings.

Approved for Insulation

A unique advantage of this spot is its approval for installation in insulation. This not only ensures a neat finish but also improved energy efficiency and safety, as proper insulation is maintained around the installation.

Choose this spot for a reliable and aesthetic lighting solution that will enhance any outdoor area.
