OZZ WL2 P65 LED position light with R65-approved strobe

OZZ WL2 P 65 warning light with integrated red light ensures optimal visibility and safety. Ultra-thin design, E-approved, syncs with 8 units.

Maximum visibility with OZZ WL2 P 65 – now with integrated red position light

When safety and visibility are crucial, it is vital to be seen – whether you're driving in heavy city traffic, on country roads, or under demanding working conditions. That is why OZZ Lights now launches the new OZZ WL2 P 65, an evolution of the popular WL1 65, which is now equipped with an integrated red position light.

The new OZZ WL2 P 65 combines a powerful warning function with enhanced visibility and a modern design. The result is a warning light that is ideal for service vehicles, construction machinery, special transports, and emergency vehicles where maximum attention is essential.

OZZ WL2 P 65 is an E-approved, ultra-thin warning light with two effective flash patterns, ensuring optimal visibility both day and night – regardless of weather and lighting conditions. The sleek design makes it easy to integrate the light discreetly onto the vehicle, while installation is quick and simple.

The robust construction is designed to withstand even the most demanding environments, from daily city driving to challenging terrains and harsh working conditions.

For an even more professional lighting display, the OZZ WL2 P 65 can be synchronized with up to eight units. This provides uniform and clear warning lighting all around the vehicle, enhancing both safety and visual impact.

OZZ WL2 P 65 – developed to be seen, built to last.
