Troldtekt LED Track Set 3x60 cm

Recessed LED lighting for Troldtekt, FibroTech and acoustic ceilings

Troldtekt LED Track Set 3x60 cm – Akustilight

Recessed LED lighting for Troldtekt, FibroTech and acoustic ceilings

Create elegant and uniform lighting directly integrated into the ceiling with this complete Akustilight LED track set. The system is specially designed for Troldtekt, FibroTech and similar acoustic ceiling panels, where the three 60 cm LED tracks are installed flush between the ceiling panels.

The practical plug & play solution makes installation easy. The complete set includes LED tracks, splitters, cables, a start cable and a 24V driver. The tracks can be installed without modifying the ceiling panels, resulting in a clean and minimalist appearance.

The matte cover provides a smooth and uniform light output without giving the impression of a traditional light fixture. The LED tracks are made from moulded, powder-coated aluminium, providing a durable construction and a high-quality finish.

Key Features
