LED DRL conversion kit for Volvo FH5 / FM5 / AERO 2021+ - Warm white - restsalg 451

REFURBISHED: A complete set with LED light emitters for retrofitting your Volvo FH' white light. Fits both LED and halogen headlights. Available in warm white. From 2021+.

Note that this product is a clearance sale. We only have 2 products(s) in stock.

Complete set LED emitters for retrofitting your Volvo FH5, FM5, or AERO with amber DRL, or simply for replacing your emitters if one of the original breaks. These fit Volvo FH5, FM5, and Aero from 2021 and forward. There are in total 8 high-power LEDs per set with an output that is equivalent to the original.

Fits both LED and halogen headlights.

The emitters are designed for optimal durability, with powerful high-power LEDs placed on aluminum PCBs, while the original is standard PCBs. The aluminum increases the heat transfer to the heat sinks and ensures the maximum life span of the LEDs. The original connectors are used on all emitters, so connecting them is straightforward.

Notice that the emitters are not e-approved.

Each set contains four emitters and thermal paste for the mounting. There are two emitters for each side.
