Matronics Beam and wigwag controller, 10-30V

Control your high beams in 2 groups and WIG-WAG/strobe flashing with this 8-channel 10-30V controller. Easy wiring and setup.

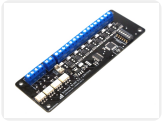

The Matronics Beam Controller is a robust 8-channel light controller for 10–30V systems, designed for controlling high beams and WIG-WAG/strobe functions on vehicles. It provides a sharp, professional lighting appearance with fast response, stable timing and simple setup. It solves the issue of ensuring that all lights cannot be switched on at the same time, while also providing additional functions and configuration options.
