Matronics light source for VW Audi Seat Skoda interior light for center console

Efficient red lighting for VW, Audi, Seat, and Skoda center consoles.

Light source for the center console in VW, Audi, Seat, and Skoda vehicles. Disassemble the original lamp to remove the light source and insert the new one. This solution allows you to easily replace the standard white light with a more intense red.

The original light source has one LED, whereas the new one features three LEDs.

A small screwdriver is required to press the clips to remove the glass.
