H7 LED Bulb 10-30V

H7 socket with 18 powerful SMD diodes.

H7 LED bulb with 24 powerful SMD 3-Chip LEDs, which give Xenon white light. It can be used as day-running lights in the headlights and as fog lights.

The brightness corresponds to approx. 20W of power, so that they can not replace ordinary halogen bulbs.

There is a built-in voltage regulator, so that the LEDs are protected for over voltage, which gives you a longer life.

Note: It does not tolerate high heat, so they must not be mounted in the same lamp body as halogen bulbs.

The pears are, unfortunately, not E-approved.
