5 pcs. LED Mini Spot 24V

A smart little LED spot with chrome or black metal housing, which is typically used for spot-lighting in upholstery in trucks / lorries.

A smart little LED spot in chrome or black metal housing, which is typically used for spot-lighting in upholstery in trucks / lorries.

The 5mm diode is built into a metal bushing with threads, so that you can screw the LEDs in panels etc. They are mounted in a 9mm hole and need 10mm space at the back. The special washer is included, and is typically used when replacing a plush-button.

The spots will not heat up during use.

1 m cable - only for indoor use.
