Shunt cable clamp

Get easy power from the original wiring harness without cutting into the wires. Three sizes.

Get easy power from the original wiring harness without cutting into the wires.

The shunt cable clamp is put over the cable you need the power from and an extra wire is put in. The metal clamp is then pushed down with a plier. The lid is then clicked down.

The color of the clamp shows what wire-thickness it fits:

Red: 0,5 - 0,8mm²

Blue: 1,0 - 2,5mm²

Yellow: 2,5 - 6,0mm²

Max. current is 24A and max. 600V, but beware that cables will have lower rating.
