# LED dimmer switch, 12V-24V - 8 Amp.

Compact little 12-24V DC LED dimmer with a rotary knob that can handle up to 8A. Available with a built-in knob or on a cable.

Compact 12-24V DC LED dimmer with a rotary knob that can handle up to 8A. Available with a built-in knob or on a 45cm cable.

Connecting it is very simple, as there is only a single input and output channel. There are screw terminals for input and output.

The measurements of the box are 90x60x35mm (L x W x D) and the screw button is 20 mm high.

The hole for the knob on the wire must be 8mm. There is a nut included for fastening.
