# 10 pcs. Blue SMD module-12V

Splash-proof LED modules with a blue light, which can be used for example as a signal lighting.

Splash-proof LED modules, which can be used for example as a signal lighting. In each LED module there are 3 pcs. powerful SMD diodes and on the back, there is a powerful 3 m tape.
LED modules are built up in chains with 10 pcs. and there is a 10 cm wire between each.
The modules connect to 12Vdc and the chains can be extended or shorten up as needed.

Thus, it is a very flexible solution covering many needs such as lysbogstaver, illuminated signs and decorating tasks.

Consumption per 10 PCs: 12V x 0.6 (A) = 7.2 W
