LED Flash Relay 12V 0.02 A-20A-CF13

CF13 LED blink-relay that replaces a normal CF13 blink-relay. Used for LED converstions, so the blink-light has the same speed without cheat-resistors.

Your light system blinks too fast or too slow, or not at all. Then we have the solution for you. This blink relay is the perfect solution, since it is built specifically for LEDs.

Suitable for most cars, motorcycles, Atvs and scooters with 12V electrical system.

Note: can be used both for diodes and incandescent bulbs, also mixed.

Technical data:

- Voltage from 11.5 to 14.8 volts
- Power 0.02 A-20A
- Low heat
- Dimensions: 30 x 30 x 39cm (L x W x H)
- Can be used both for diodes and incandescent bulb, also mixed.
