LED Flash Relay 12V 0.02 A-20A CF14

CF14 LED blink-relay that replaces a normal CF14 blink-relay. Used for LED converstions, so the blink-light has the same speed without cheat-resistors.

Your light blinks too fast or too slow or not at all. Then we have the solution for you. This blink relay is the perfect solution, since it is built specifically for LEDs.

Buy online at:
