An extra heavy duty 21/4W Xenon White LED bulb with 24 pcs. 5050 SMD diodes, which together make 270 lumens.

An extra heavy BAZ15D Xenon White LED bulb with 24 pcs. 5050 SMD diodes, which together make 270 lumens. The LED bulbs are used for the run/position lights. The LEDs bulb location makes the whole dish to light up. The bulb has a built-in voltage regulator that protects from overvoltage and thereby also provides a longer life.

The bulb is +-driven, so that it only works on vehicles, where the position/driving light is activated with a + wire. The bulb has a built-in voltage regulator, so that it works on 11 ~ 16 volt without the damage of charging voltage etc.

The diameter of the bulb is 20 mm.

50 mm long (measured from the pole to the diode peak).
