A warm white LED bulb Bay15D marine with 24 pcs. 5050 SMD diodes, which together make 280 lumen. The bulb may well replace a regular 20 ~ 30 watt incandescent bulb and the natural color makes the bulb suitable for lighting in the cabin/stateroom/Lantern.

The bulb has a built-in voltage regulator, so it works on 10-30 Vdc without getting demaged by the charging voltage etc.

NOTE: This light bulb is for "marine lamps", where there are + and - at the bottom, so this light bulb does not have 2 levels of intensity.
Legs/dots on the side of the synthesis are offset to each other.
