Niko universal dimmer for dimmable LED bulbs

In the process of switching to LED, certain dampers can have problems with the lower power consumption. Niko's universal dimmer takes care of this.

In the process of switching to LED, certain dampers can have problems with the lower power consumption. Niko's universal dimmer takes care of this and makes it possible to swap the existing tablet dimmer or the impulse switch. The low requirements for a minimum consumption and the special engineering enables the control of dimmable 230V LED bulbs and of iron core transformers for 12V LED bulbs.

Input: 8 ~ 230V
Minimum consumption: 5W at the joints and 20W at the iron core transformer
-Max 10 LED light sources

This universal dimmer must only be replaced/installed by electrician.
