LED Marker Lamp, 6 LEDs - 24V

A compact flat 24V LED side-marker lamp with 6 LEDs. It is only 6.4 mm high and 96 mm long.

A compact flat 24V LED side-marker lamp with 6 LEDs. It is only 6.4 mm thick and 96 x 20mm and E-approved. A fitted 20cm cable - the orange is also available with 5 meters cable.

Very universal marker lamp that can be used for extra marking, taillight and indication.

Notice that there are many copies of this lamp. Our experiences tells us that many of these models quickly become defective because of water. The bullet points below clearly shows why this model is superior to the cheaper models:

- Rubber seals around the wires on the back
- Extra thick base, so it is not bent easily
- The glass has been glued securely on with visible glue all around the base
- The LEDs are placed correctly in the lenses of the front glass
